PT A instalação só deve ser efectuada por instaladores sanitários que possuam formação, conhecimentos e experiência profissional adequada. A torneira deve ser instalada de acordo com a pressão de água recomendada, indicada no quadro anterior.

EN The installation should be carried out only by sanitary installers who have appropriate professional training, knowledge and experience. The tap should be installed according to the recommended water pressure, shown in the previous table.

1.1

PT Antes da instalação, limpe o tubo que vai ligar à torneira, caso contrário a lama ou a sujidade presentes nas tubagens poderão bloquear a torneira e comprometer o correto abastecimento de água. Certifique-se de que a pressão da saída da água fria e quente cumpre os requisitos da torneira.

EN Before installation, clean the pipe that will connect to the tap, otherwise mud or dirt in the pipes could block the tap and compromise the correct water supply. Make sure the output pressure of cold and hot water meet the requirements of faucet.

1.2

PT O cartucho da válvula e outras peças da torneira foram bem justificadas pelo fabricante, por favor não as desmonte você mesmo.

EN The valve cartridge and other parts of faucet have been justified well by manufacturer, please don't disassemble them by yourself.

1.3

PT Certifique-se de que as ligações para a água quente e para a água fria estão corretas.

EN Make sure that the hot and cold water connections are correct.

1.4

PT Quando a temperatura ambiente for inferior a 1°C, desaperte a torneira e descarregue a água na torneira, caso contrário a torneira pode partir-se devido ao gelo.

EN When the room temperature is under 1°C, unscrew the faucet and discharge the water in the faucet, otherwise the faucet maybe be broken by ice.

Os agentes de limpeza abrasivos ou agressivos podem danificar a superfície.

Para limpar, utilize um detergente de pH neutro e água morna, juntamente com um pano de limpeza limpo e macio.

Aplicar o detergente em spray no pano de limpeza e **NÃO** pulverizar diretamente sobre o produto. A névoa do spray pode penetrar nas aberturas e fendas mais pequenas, danificando a superfície. Limpe regularmente ou imediatamente se a superfície ficar suja. Intervalos de limpeza longos podem levar a sujidade difícil de remover.

Para a limpeza diária: Limpe a superfície com um pano macio e húmido.

Para sujidade mais pesada: Aplique água morna e detergente no pano de limpeza. Em seguida, limpe os resíduos de detergente com um pano macio e húmido e seque a superfície.

EN

Abrasive or aggressive cleaning agents may damage the surface.

To clean, use a ph-neutral detergent along with a clean, soft cleaning cloth.

Apply spray detergent to the cleaning cloth and **DO NOT** spray directly onto the product.

Spray mist can penetrate the smallest openings and crevices, damaging the surface.

Clean regularly, or immediately if the surface becomes dirty. Long cleaning intervals can lead to soiling that is difficult to remove

For daily cleaning: Wipe the surface with a soft, damp cloth.

For heavier soiling: Apply warm water and detergent to the cleaning cloth. Then wipe off detergent residues with a soft, damp cloth and dry the surface.
